### Summary

Computer Science student at Kennesaw State University with hands-on experience in AI model evaluation, data analysis, and web development. Proven ability to improve conversational AI quality through structured testing, prompt evaluation, and data-driven insights. Skilled in translating complex data into actionable recommendations that enhance product performance and user experience.

Experience working in real-world production environments using Python, Django, Git, and data analysis tools. Strong interest in Software Engineering, Backend Development, AI Quality Assurance, and Data Analytics, with a continuous focus on learning and building impactful solutions.

### Technical and Soft skills

- Programming: Python, Java, C#, SQL (basic)
- Web Development: Django, HTML/CSS, Backend Fundamentals
- Data Analysis: Excel (Pivot Tables, Charts), Pandas, Jupyter Notebook
- AI & QA: Prompt Testing, Transcript Evaluation, Model Validation
- Tools & Platforms: Git, GitHub
- Analytical Skills: Data Interpretation, Trend Analysis, Reporting
- Soft skills: Agile teamwork, documentation, cross-functional communication, Analytical Thinking, and Presentations

### Professional Experience

#### AI Model & Testing Intern MahoAI - Atlanta, GA Jan 2025 – Oct 2025

- Conducted prompt testing and transcript evaluations to assess AI model accuracy, tone, and compliance with quality standards
- Identified recurring error patterns and provided structured feedback to improve model performance and training data
- Collaborated with engineering teams using Git-based workflows to enhance frontend and backend website behavior
- Contributed to documentation and reporting, accelerating AI quality improvement initiatives
- Supported development-related workflows using Python and Django in a production environment
- Analyzed AI platform capabilities by creating a structured API vs UI feature comparison matrix to identify workflow overlap and product differences

#### Walgreens — United States Jun 2022 – Present

- Provided customer service in a fast-paced retail environment
- Handled transactions, inventory, and customer inquiries efficiently
- Developed strong communication and customer facing skills

### Projects:

- Personal Portfolio (link will be added)
- Fantasy Football Pandas Tool (link will be added)
- GitHub Profile: <https://github.com/TKhan91939>

### **Certifications**

Tools for Data Science — IBM (Issued Aug 2023)

### **Education**

**Bachelor of Science in Computer Science**

Kennesaw State University

Expected Graduation: (Add if known)
